# HEIGHT ADJUSTABLE HEALTHY WORKING

## A BIT ABOUT ERGONOMICS

### Ergonomics and your health

Every day more and more people are enjoying the many benefits of working while standing.

Numerous studies show that working from a sitting position for extended periods of time is clearly detrimental to your health. In fact in a study cited in the journal *Medicine & Science in Sports & Exercise* found that people who sit for most of the day were 54 % more likely to die of heart attacks. This was a study of 1700 people over a 13 year period. *Men's Health* reports that this statistic is true even if the people in the study were nonsmokers and regular exercisers.

The ConSet line of electrical height adjustable desks gives you the power to transform how you live and work. Standing for portions of your day may be the simplest and most effective way to control weight gain, increase productivity and combat mental fatigue and back pain.

ConSet desks can help to improve your quality of life and help you to live longer.

The benefits are clear and the good news is that ConSet desks are the most affordable desks on the market. Designed and engineered in Denmark they combine high quality, low cost and beautiful design aesthetic. Stationary desks are so yesterday. Enjoy the benefits of ConSet electric height adjustable desks today and for the rest of your life.

Stop sitting down on the job and stand up for your health !

### A world of choices ...

Your options are plentiful when choosing the ConSet desk which is right for you. The desk frame you choose depends on the required maximum load, size and function as well as the interior design.

### Your choice of frame ...

ConSet has desks of different designs and frames with different maximum working loads:

How to choose the right combination? Call your ConSet dealer they will be pleased to help you do that. Consider the LOAD and TASK when choosing the right desk series for you.

### Load

The kg capacity figures show the overall maximum peak lifting capacity of the frame. Load will depend on two factors:

- The weight of the tabletop itself  
*(e.g. a 1500 mm x 800 mm top weighs about 20 kg, whilst a 2000 mm x 800 mm top weighs about 25 kg)*
- The total weight of the items on your desktop.  
*Some desks become loaded over time with books, magazines, filing trays in addition to PC, printer, scanner. If in doubt then always buy the heavier option if your budget allows.*
- The speed of upward travel will be slower as load is increased.

### Task

If you are working using an electronic microscope for example you will need the firmest stability. E.g. a Solid-Line desk will feel more solid standing than a 501-33. On the other hand the 501-33 is adequate for the tasks of writing and using a Personal Computer and it will be much easier to move than a Solid-Line. Other issues to consider could include long working hours or multi-shift use. We want your desk to last well beyond the warranty period. A 100 kg frame used with a 60 kg load will usually last longer than a 80 kg frame with a 60 kg load.

RECTANGULAR ELECTRIC SIT-STAND DESK

### Frame Specifications (without worktop)

Height range: 625 - 1230mm  
Max. working load: 100kg frame

501-88 4B172 180-80S3 WM

Functional bench desk with an open frame design. The 501-88 is very suitable for large office environments and the design makes it easy to separate the desks from each other with a partition screen. Minimize cable clutter and mount a cable tray, which also makes cleaning a lot easier. 501-88 is a functional, robust and durable desk for all purposes.

## CONSET – A DANISH COMPANY

We began with the idea to develop and manufacture high quality electric height adjustable desks and to make them affordable so more people could experience the benefits of sit / stand desks.

The company has succeeded quite well and now has distribution and subsidiaries throughout the world.

ConSet at its core is an engineering company that develops the products down to the smallest component. Since every component of a ConSet desk is developed and produced by the company including our patented drive system we are able to control our costs and achieve our goal.

Quality, consistency, value and support is what you will experience with ConSet at every level of our organization.

### Environment

At ConSet we think it is important to minimize environmental impacts.

We want to take responsibility for ensuring that our products are made respecting the environment.

We do this in several ways :

- Our wood products are FSC, which is a guarantee that you can buy our tabletops and other wood products in good conscience. FSC criteria prohibits conversion of forests or any other natural habitat.

### CE marking

All ConSet electric height adjustable desk frames are CE marked in collaboration with the Technological Institute

in Denmark. CE marking is a requirement for height adjustable desk frames and it allows you to be sure that the producer has been through all aspects of security risk.

Furthermore, our power supplies are GS-tested ( German standard ).

### ConSet on the web

Constantly we work to ensure that our website is functional and useful to our customers.

All relevant information and specifications are available on our website and acts as a supplement to our printed material including :

- Assembly instructions
- Drawings ( PDF- and CAD-files )
- Technical specifications
- Videos with assembly instructions
- Images for download

# ABOUT US

- All electronic components meet RoHS framework for the reduction of hazardous substances in electronics, whereby the environmental impact is minimized.
- From January 2010 a new law concerning standby consumption took effect. All our sit / stand frames meet the legal requirements for this.

Read more about the environment on

## PRODUCT APPROVALS

### Dimensional requirements:

EN 527-1:

All ConSet products meet the necessary requirements within the following relevant categories:

### **Office furniture – Workplaces and desks – Part 1 : Dimensions**

This means that the products meet all requirements for a healthy work environment, ie. leg room, height, depth, etc.

### Strength, durability and stability:

EN 527-2:

### **Office furniture – Workplaces and desks – Part 2 : Mechanical safety requirements**

A product standard that describes all basic safety requirements and ensures that the tables meet all requirements for physical exertion, and that all mechanical requirements are adhered to.

EN 527-3:

### **Office furniture – Workplaces and desks – Part 3 : Methods of test for the determination of the stability and the mechanical strength of the structure**

Methods of testing for the determination of the stability and mechanical strength of the structure. A standard for product approval, where the product goes through a variety of tests to comply with the requirements of EN 527-2. Within desks these are technically focused on the strength of horizontal and vertical loading fatigue and tipping.

## WARRANTY

**5 year warranty**

**5 years**

On motor and frame

**\*Warranty covers replacement parts only, it does not cover onsite labour or freight costs**

**\*501-43 straight fixed rail only**
